Experience

2017-09

- present

Programmer, Producer, Designer

Shattered Journal Games

- Focused on making impact feel more powerful with use of multiple hit-spark effects and blood variations.
- Programmed systems to make it easier for designers to create new weapons, toppings, and levels.
- Pinpointed what characters lacked in their playstyle and added more utility and synergy for each attack.
- Balanced characters with live data obtained from analytics in tournaments.
- Experience working and porting to Windows, Mac, Android, iOS, and WebGL.

2020-03

- 2020-11

Programmer

Vortex Games

- Focused on making UI systems clearer and more visually appealing.
- Fixed bugs that made some UI buttons and features unusable.

2018-01

- 2020-05

Programmer

MassDigi

- Created player and enemy systems, most UI systems, wave progression, and power-up system.
- Implemented analytics to collect data on how people played and what choices they made.
- Prototyped different mechanics for newer levels and balanced existing levels.

2018-04

- 2019-04

Programmer

Ukuza

- Programmed several boss interactions and prototyped new bosses.
- Optimized and managed build pipeline.

Volunteering

2018-09

- 2020-05

Becker College IGDA Chapter

- Organized, planned, and scheduled game development related events, such as talks and game jams.
- Helped create a pathway for students into the games industry.

Education

2017-09

- 2020-05

Game Development & Programming, Bachelor of Arts

Becker College, Worcester, MA

- Dean's List (3.5 GPA)
